

Cataract Post-Operative Accreditation Webinar

Presented by Dr Alex Silvester – Medical Director

2 CPD Points

SpaMedica is currently the number one provider of cataract surgeries for NHS patients in the UK; with Fifty hospitals based across the North West, the Midlands, Yorkshire, the South East and the South West.

A key part of our cataract service is being able to offer our patients the opportunity to have their cataract post-operative assessment at their referring optician's practice – 73% of our patients' post-op assessments are booked in and managed by more than 5,000 accredited community optometrists.

The feedback we receive from our accredited partner optometrists is overwhelmingly positive and the main benefits of becoming accredited are:

- Rapid referral to treatment times for your NHS patients
- Our team of experts supporting you with ophthalmic and referral queries
- Two CPD points for attending SpaMedica's cataract post-op training event
- 24hr patient helpline for referral and treatment queries
- Patients are returned back to community optometrists quickly after surgery
- Regular communication about patients sent to you, throughout their treatment journey

Our accreditation evening runs from 6.30pm to 8.30pm. SpaMedica is registered with the GOC as a CPD provider and you will receive two interactive CPD points for attending our Cataract Post-op Accreditation session.

You will need to have been qualified for a minimum of one year to be eligible to become a SpaMedica Cataract Post-op Accreditation Partner.

If you are already accredited to our post-op scheme, then attending this session is not mandatory, but you are welcome to book a place for a refresher and receive two CPD points.
