Suspected Wet AMD referrals only (other macular referrals will not be accepted) ▶

4 For Post-Ops, you will see three core categories:\

1. Discharge
2. Refer for second eye (no complications)\
3. Complications found (this will also permit you to flag to the first eye provider for second eye if needed)

For referrals (excluding Cataract) to NHS & independent sector providers within LLR I.C.B. the service will clinically triage & then onward refer to the provider you have selected.

5 You will then be taken to a form, where additional information can be added and submitted. The process is then the same as raising standard referrals.

Please note: To preserve data quality for the post operative reports, the data must be entered into the form.

i Tip!

If your Optometry PMS system is compatible with the EeRS API, data can be passed into Cinapsis automatically. You may need to speak to your PMS provider to activate the integration with Cinapsis.

A list of providers and their status is listed here (you must be logged into Cinapsis to view the article): <https://support.cinapsis.com/hc/en-gb/articles/17821539243281-EeRS-supplier-integration-Ophthalmology-only>

Please feel free to contact support@cinapsis.com should you have any questions.
