

To all our patients and service users

We're aware of the lifting of the remaining Covid-19 restrictions from January 2022.

Face masks are still required in health premises. This is a government requirement to comply with infection prevention and control.

We still need to act cautiously to stop the spread of the virus. Health premises are a higher risk environment and we need to maintain some control measures to keep everyone safe.

So we are asking everyone visiting health premises to:

- **Wear a face mask**
- **Maintain social distancing**
- **Use hand gel or wash your hands**
