SURREY DIABETIC EYE SCREENING PROGRAMME

PROTECT YOUR VISION THIS RAMADAN: EYE DROPS WON'T BREAK YOUR FAST!

"According to the majority of Islamic scholars, eye drops do not invalidate the fast. **If you follow a different scholarly opinion, please speak to your Imam or healthcare team.**"

Mufti Mohammed Zubair Butt, Bradford Council for Mosques

It's important to continue taking eye drops or using the tropicamide eye drops provided at your diabetic eye screening appointment, including during the month of Ramadan.

COUNCIL for MOSQUES BRADFORD & DISTRICT

"In Islam, preserving health is important. If you are unwell, exemptions and alternatives to fasting are available, please speak to your GP or healthcare team."

Your vision matters – **attend your appointment!**

"**Blocking my tear duct** means the drops stay in my eye and don't reach the back of my throat."

Patient

ذیابیطس میں آنکھوں کی اسکریننگ آپ کی ذیابیطسی نگہداشت کا ایک اہم حصہ ہے۔ ہم اسکریننگ پیش کرتے ہیں کیونکہ یہ بصارت کھونے سے تحفظ فراہم کرتی ہے۔

"Using eye drops helps us to **see the back of your eyes clearly**."

Screener

Eye screening in diabetes is an important part of your diabetes care. We offer screening because it protects against vision loss.
